Cybersecurity

Cyber-attacks are a growing threat for all businesses. Many smaller businesses don’t think they need to worry about it, but any business is susceptible. As your community’s business “pit crew” – could you share information and resources that might help businesses prevent attacks? Use your BREI visits to recognize when a business might need some encouragement to think about or do something about upping their cybersecurity game!

How _________area businesses handle and protect data is critical to the security of their business and local economy. Meeting the growing privacy expectations of customers, employees and supply chain partners can be a challenge. Customer, vendor and client information; payment information; personnel files; and bank account details are often impossible replace or to operate your business if lost. It can also be dangerous in the hands of criminals. Take a few minutes and read “Stay safe from cyber threats” from the SBA’s online Business Guide to get an overview of common cyber-security threats, tools for assessing your business risk, and quick and easy best practices that you can implement this week! It is time well spent.

BREI Discussion Starters for Your Visits with Local Businesses

1. I keep reading that every industry has concerns about cybersecurity. What are you doing to evaluate and address concerns here at _____________?
2. Is maintaining data and information privacy, whether it is for customers, clients or staff, a concern for _______? How are you addressing that? What have you learned along the way?
3. How do you learn about best practices related to cybersecurity in your industry? What are you trying to implement?
4. They always say, “people are the weakest link when it comes to cybersecurity!” – How are you training your staff to prevent, detect, and respond to cyber incidents?
5. There are resources in Iowa to help businesses assess threats and explore cybersecurity solutions. When you think about _____________ is this an area you would like or need more information or assistance?
